

Chocolate

drink of the Gods, but now a pleasure for you and me

This exhibit will reply the questions how chocolate was imported to Europe as a drink for Gods and Kings, and how it became a pleasure for (every)body and mind.

What did the Mesoamericans admire so much? Is it really a gift of God?

Or just something that grows on a high tree? Is it just a big pod that can be turned into chocolate by accident?

Cacao pod as money box

On his 4th voyage to the 'New World' between 1502 and 1504, Christopher Columbus discovered cacao beans while 'robbing' the cargo of a Mayan trader, near modern Honduras. He assumed they were a kind of almond, but were very valuable as 'coins of the realm', and used for trading.

Perforation error

White flaw by paper crease

In the beginning, Columbus was totally obsessed by gold, and had little interest in the small beans, not realizing the future important economic worth in the New World.

Proof on hard paper

He is believed to take the cacao beans as first to Europe, together with other fruit and vegetables.

1.1 The discovery, a Mesoamerican Genesis

among other treasures

Stamp of booklet also issued separately

◀ Celebrating 500 years of discovering America and its agriculture

Columbus also took back many other treasures like; corn, tomato, tobacco, potato and cacao.

Then Spanish explorer **Hernando Cortez** landed at Tabasco another cacao-intensive producing region in the Mexican Gulf in 1519. His army marched on the Aztec capital of Tenochtitlan meeting Montezuma, who presented him with a large load of cacao beans, serving the cold frothy drink, to his new Spanish guests, again in golden goblets.

Juan de Zumárraga, (1468–1548), a Basque Spanish friar and first bishop of Mexico, is credited with making chocolate a popular drink among Europeans.

Juan de Zumárraga

Print error underinking; faint design lacking color

Tabasco

Cortez also realized the commercial possibilities of this 'food of the Gods'. **Fray Toribio de Motolinia** (priest) on joining Cortez, noticed how the Aztec's prepared the beans for the royal drink.

Cortez, on arriving back in Grenada (Spain) in 1528, presented King Charles V the beans from his own plantations and also explained how to make the drink.

Coat of Arms with motto 'Plus Ultra' added by Charles V referring to the 'New World' ►

Grenada: perforation error

Charles V was so moved by the sweetened, refined drink that he immediately decreed it to be reserved exclusively for the enjoyment of nobility.

For about 100 years, only Spanish monks were entrusted with the secret, until **Felipe IV**: his wife was near death but mysteriously recovered after drinking hot chocolate. Witnessing the miracle the monks declared it a gift from God, deserving to be enjoyed by all.

After the 1492 edict of expulsion of Spanish Jews and the onslaught of the Portuguese Inquisition in 1536, many Jews sought asylum in Bayonne, France. They imported tools and knowledge of cocoa, ...

... and taught local workers the secrets of processing chocolate. In Bayonne we find the first artisans and chocolatiers guild and by 1854 it was home to at least 34 chocolate companies.

Alba D'Oro. Golden Dawn

One Florentine family (merchants of exotic products) visited cocoa plantations near Nicaragua end 1500s. and saw immediately the huge trade possibilities for Italy. When they returned home, they introduced it to Pope Clemens VIII. The black gold is discovered and announced as golden dawn.

Maximum card (Vatican - 1954):

Alexander VII

Proof (Paraguay)
Jesuits works

Clemens VIII

Trade quickly expanded due to the **Jesuits**. In mid-1600 it was presented in the Pope's court but had to be investigated to see if its consumption would interrupt a required fast.

By 1662 the problem loomed large and Pope **Alexander VII** gave a final answer when he stated: "Liquidum non frangit jejunum." (Liquids [including chocolate] do not break the fast)

It is likely his decision was based on the fact that like so many other herbs, it was considered to have medicinal qualities.

Many priests drank chocolate before celebrating mass, as did **Cardinal Mazarin**, who 'couldn't live without his daily portion'.

1.2 Royals and aristocracy addicted to their daily cup(s)

court in Austria

Charles VI

Cacao was taken to Austria in 1711 when Emperor Charles VI transferred his court from Madrid to Vienna.

His daughter Empress Maria Theresa of Austria insisted on her daily cup of chocolate drink.

Stationery international usage (Hungary-1897) to Berlin

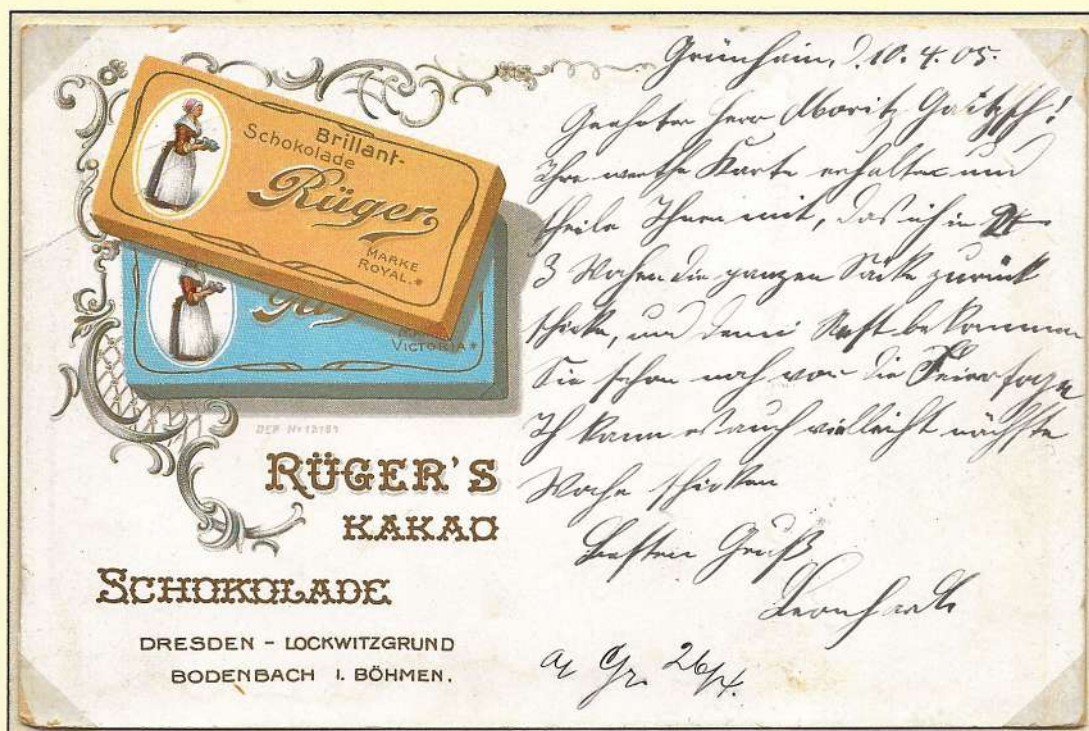

Inauguration of Empress Maria Theresa in 1740

1.3 The chocolate route around the world

expanding from South-America

Francotyp model
"CM10000"
(Netherlands-1967)

Until 1850 mid-South American plantations grew the majority of beans due to their established background with Spain and Portugal.

In Brazil, the Portuguese colonists pioneered the commercial plantation based production.

Transit cancel on back of cover (Brazil-1944)

promoting first class product cacao

After independence of Brazil, planters and colonial officials expanded cocoa cultivation from South America over the Atlantic Ocean to West-African colonies, establishing in both areas a modern industry that resulted in the world's leading cacao regions.

Venezuela produced over half of the world's chocolate in 1810, and one-third of that was consumed by the people of Spain.

Today Venezuela is still known for their high quality chocolate, but they need financial investment by micro credits (Fondafa).

Postal advertising cancel (Venezuela–1933)

VENEZUELA produces the best cacao

St Thomas and Prince

Arm with cacao pod of village Makokou (Gabon)

The Portuguese transferred production from Brazil to the West African colonies. With growing cacao consumption in Europe in the 1850's, St Thomas and Prince and Ivory Coast were one of the first cocoa-producing colonies in West Africa.

Flam Bitam (Cameroon-1954)

Center of cacao

Later it expanded to Cameroon and Gabon. They became important too to fulfil the needs from Europe and is still today.

Unfortunately, the expansion was only possible by using slaves as laborers in almost all those plantations. The slaves were imported from the West-African islands or inland.

Van Houten since 1815

The Van Houten Company was founded in Amsterdam in 1815. By the 1820s drinking chocolate was not widely developed, as the taste was of very poor quality with cacao beans ground into a fine mass.

In 1828 Van Houten invented a cocoa-pressing method, and was granted a patent from King William I. The solids were separated from the cocoa butter by means of pressing (crushing) and then treating the solids with alkali; the acids were neutralized, fibers softened, and disintegrated.

Callebaut founded in Belgium, began producing chocolate bars in 1911 and in 1925 chocolate couvertures. In 1930 they invented a unique way of transporting liquid chocolate to provide the food industry and large chocolatiers. They are one of the rare chocolate manufacturers that even today, still select, roast and grind's its own cocoa beans.

2. Cacao pods transformed into a tidbit

2.1 How to grow the 'Food of the Gods'

Linnaeus and little flowers

First machine-produced stamp booklet of Sweden, using sheets imperforated at right and left. 1 of 5 contains imperforated side

It was called "xocol-atl" (pronounced "shoco-latl") by the Aztecs. In 1753 the cacao tree was recognized by famous Swedish scientist and naturalist, **Carolus Linnaeus**. He named it "Theobroma cacao", [the food of the Gods] in the family Malvaceae.

◀ Carolus Linnaeus

A tree can grow as tall as 12-15 m in the wild but to facilitate harvesting most cocoa farmers do not let it grow higher than 4-8 m. It's not known for certain how long they live, but on average around 50 years.

Printed to order journal wrapper (Switzerland -1911)

Chocolate Factory

'De Villars', Fribourg, their logo is small cocoa tree (Theobroma cacao)

Thousands of small waxy white or pink flowers (on average 20.000 per tree) are produced in clusters directly on the trunk and older branches; this is known as cauliflory.

2.1 How to grow the 'Food of the Gods'

varieties of fruit

Francotyp-Postalia T1000 digital (Germany)

Only 10 to 50 flowers per tree will develop into pods over a 4 to 6 month period, ripening from shades of green and maroon to gold or scarlet.

Progression proof

Unripe fruit varies from pale colors and tends to yellow or orange when maturing

Criollo: orange yellow pod

Trinitario: orange brown pod

Forastero: green pod

About 20 known varieties of the cacao plants exist, but only 3 are commonly used: **Criollo**, **Forastero** and **Trinitario**. Differences are by their color and size, as well the color of the beans and hardness of the pod.

2.1 How to grow the 'Food of the Gods'

cacao tree fruit

Color proof (Gabon) with color notations

Cacao pods hanging in

▲ Specimen

Silver head shifted down

The fruit is a huge berry, usually egg or melon-shaped. Each pod weighs between 200 and 800 grams and contains 25 to 40 seeds; harvesting occurs twice yearly.

The 'cocoayer' stamp was issued (1924) together with other stamps picturing palm trees, coconut tree, sugar cane, ao. Cover sent from Agbelouve (Togo) to Schaffhausen (Switzerland); fee 1fr50 for oversees, rarely only 'cocoa tree' stamps are used.

The tree takes at least 4 years to mature before flowering and fruiting occur, but they won't just grow anywhere.

Variety upper stamp imperforated, less than 10 in existence.

Black shifted

die proof on thin paper; color codes are penciled in the margin and the proposed issued value is written in ink

A cocoa plantation has around 50 trees per 1000m², so they are rather close at 4 to 5m from each other.

Most plantations use trees neatly planted in lines.

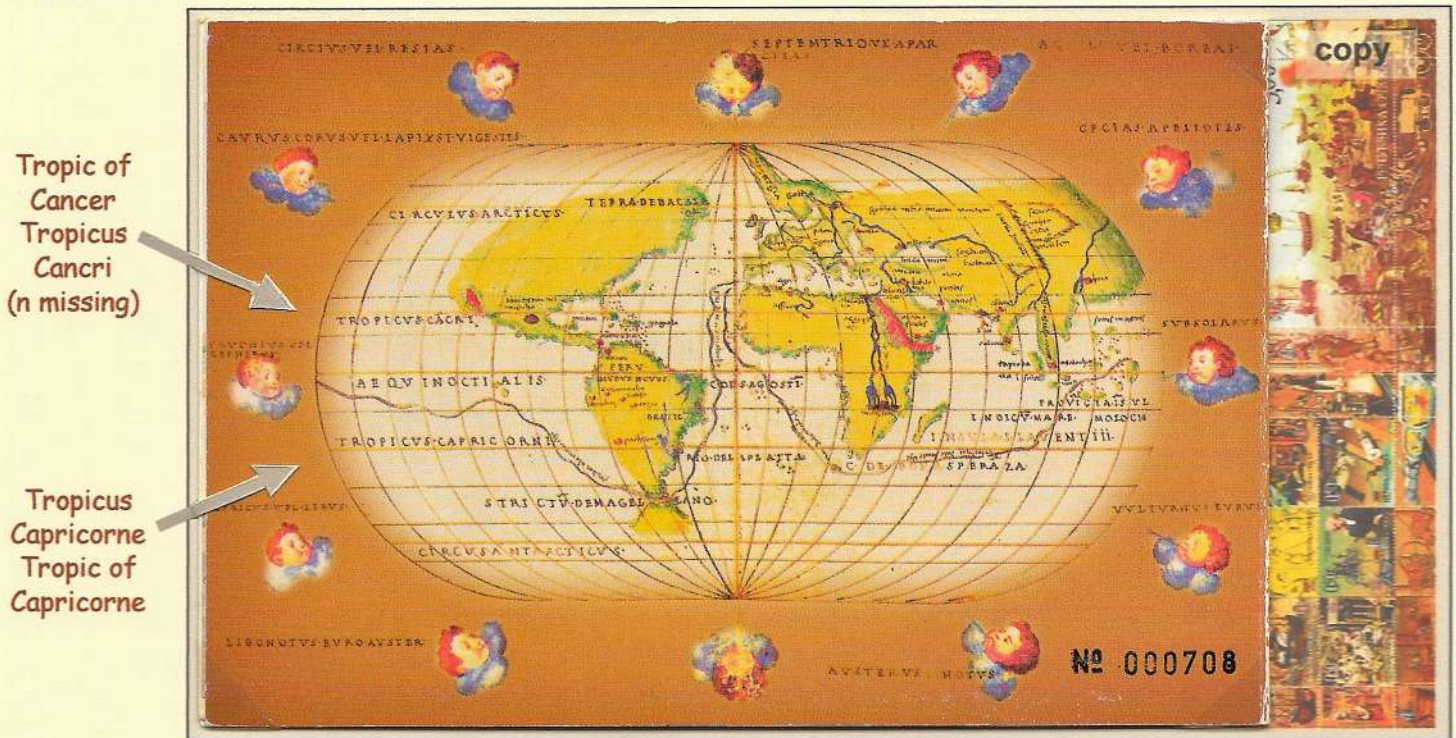

Inking faulty print

2.1 How to grow the 'Food of the Gods'

tropical biotope and enemies

A fussy tree only grows in rainforests biotope or plantations that fall within 20 degrees of the equator; from Tropic of Cancer to Tropic of Capricorn. Outside this band no one succeeded so far.

The trees need heavy regular rainfall, with rich well-drained nutrient soil, steady warm temperatures by constant sunshine and high humidity.

Tragocephala Nobilis and Phantorhytes

Cover local post service Compania del Sol (2.JAN.1845 Jerez to Cadiz - Spain)

constant sunshine

Constant controlling insect diversity in cacao plantation is mandatory as it can damage a whole plantation.

Insects such as *Tragocephala Nobilis*, *Distantiella*, *Theobroma* and *Phantorhytes* can be controlled by natural enemies but are commonly controlled using chemicals, but very carefully used to avoid damage to other important biological entities.

Distantiella Theobroma

Attempts of exploitation of cocoa-trees in natural environments did not produce the right results. It can be concluded that plantations are likely to prosper only in places where cocoa trees spread naturally.

collecting cocoa pods

2.2 Cultivation, the art of harvesting and treatment

open and remove beans

Pods are opened to remove the beans within a week to 10 days after harvesting.

A machete is normally used to split the pod, experience and correct handling avoids damage to the beans. A full grown tree gives on average, only 2 kilo of beans annually. About 60 - 65% of the weight is lost during post-harvesting because the pulpy fruit is consumed in fermentation.

Aerogramme (Portugal - 1958)

selecting, cleaning and cutting

4 base color (CMYK) +1 combined (cyan-yellow=green) proofs

After splitting, the pith-covered beans are scooped out, so that ...

... they can be fermented (allowing micro-organisms to develop) during four to seven days but should be turned every two days.

Fermenting beans

Beans are dried by spreading over a large surface and constantly raked for five to fourteen days, depending on climate conditions. In large plantations, this is done on huge trays under the sun.

drying beans

The beans should be very dry for export.

cocoa beans in drying trays

CRIG (1942 - 1967)

The Cocoa Research Institute of Ghana was established at Tafo in June 1938 as the Central Cocoa Research Station. Their mission was to encourage and facilitate production, processing and marketing of good quality cocoa in all forms, in the most efficient and cost effective manner.

2.2 Cultivation, the art of harvesting and treatment

research and protection

The Imperial College of Tropical Agriculture (Trinidad) published in 1924 its first scientific journal on research of products like cacao.

The Instituto do Cacau da Bahia was established in Brazil c1937 offering financial and infrastructural support to optimize harvest techniques. Brazil's CEPEC (cacao research center) began research activities c1963 specializing in all aspects of the processing technology.

In Colombia agriculture research began early 1929 and was organized by the 'Experimental station of Palmira'; carrying out research, experiments and training farmers.

ICCO 25 yrs celebration

To protect the world cocoa production and economy, the ICCO (International CoCao Organization) was established in 1973 and seven agreements have come into force since the first worldwide agreement was negotiated in 1993, regulating all basic aspects of the cocoa industry.

Cocoa research Institute

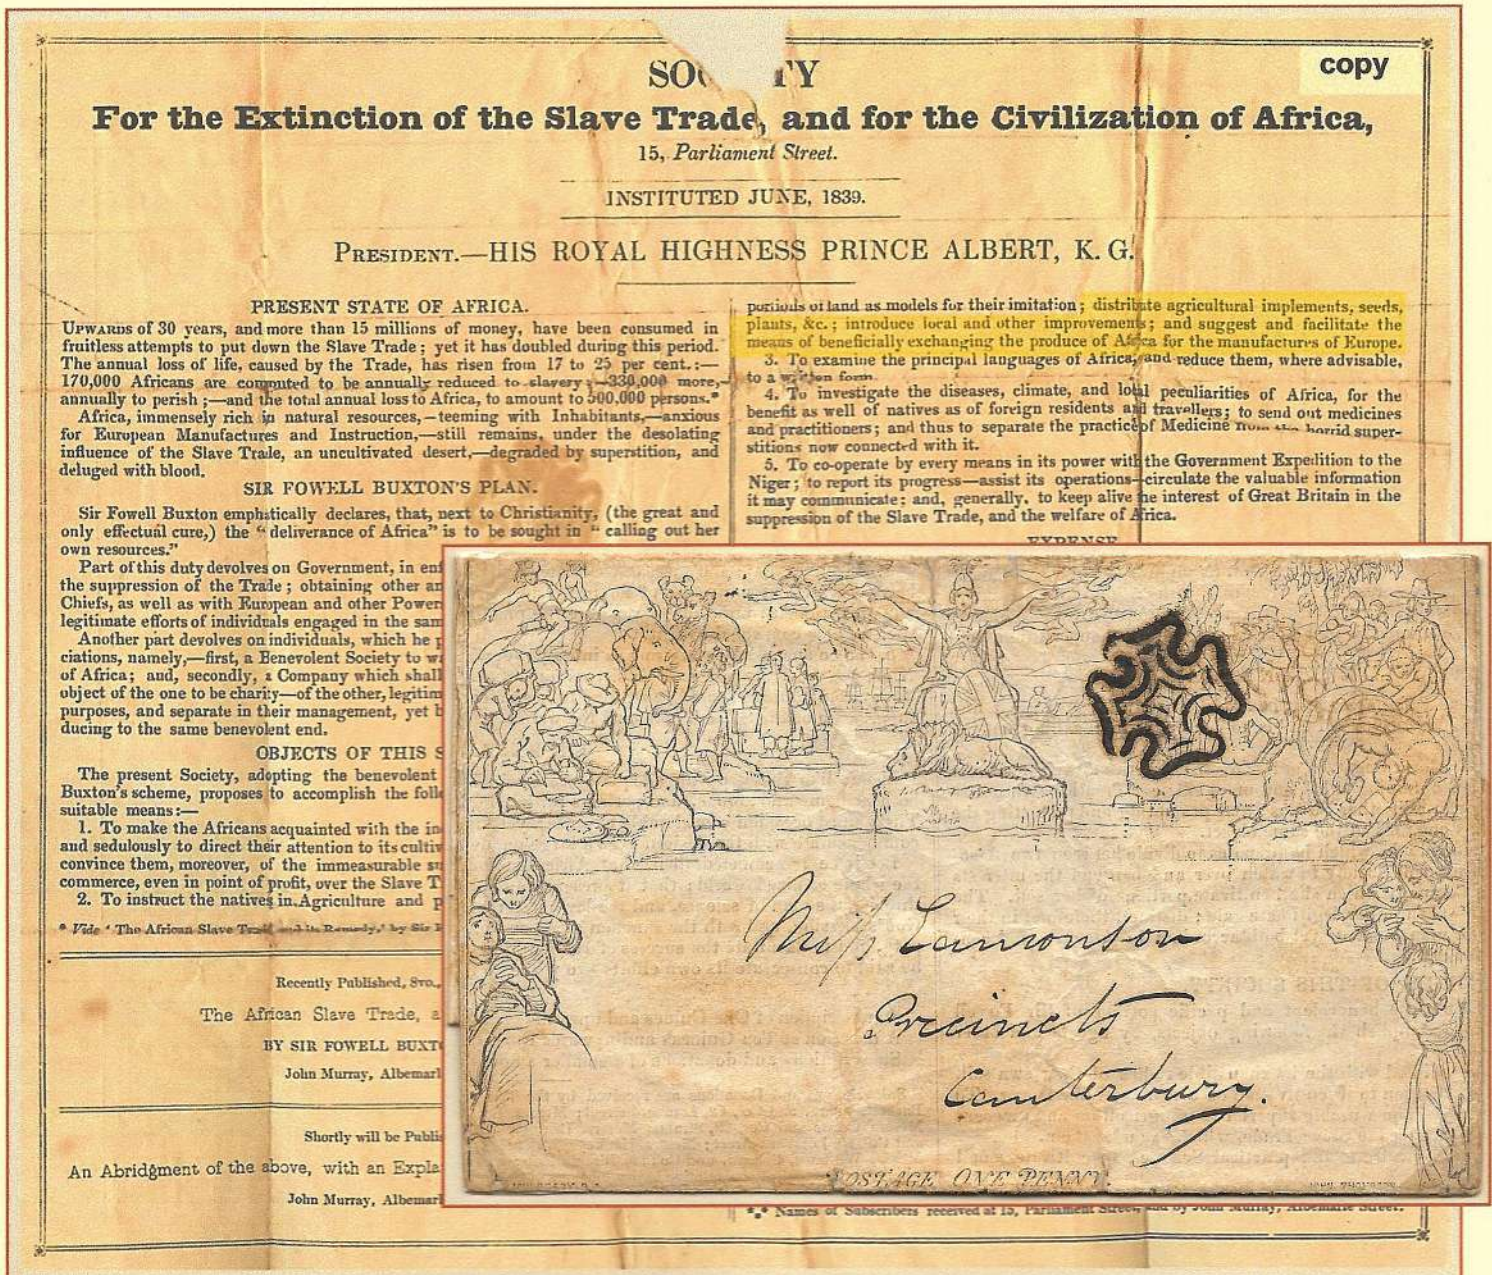

Pitney Bowes "R" (United Nations)

2.2 Cultivation, the art of harvesting and treatment

Slavery and child labor

Slavery was abolished in 1807, but it was Sir Buxton M.P. who founded the "Society for the Extinction of Slave Trade" in 1839, with objectives to civilize Africa through trading posts and agriculture development by distributing implements, seeds and plants, such as coffee, sugar, cocoa, etc... for beneficially exchanging with European manufactures as an alternative to slavery.

1d black Mulready postal stationery (Great-Britain) sheet No 8 printed in silk thread paper (withdrawn in January 1841) sent 11 Feb 1841 with advert printed inside - foundation of society 'for the Extinction of the Slave Trade' by Sir P. Buxton.

Even today (2017) child labor, slavery and human trafficking on cocoa farms can be found. Some countries publish this fact, as shown on their stamp issues.

Child labor on stamp border; opening pods

Transportation from the American and African continents was carried out as it is still done today, in cargo ships.

In Metropolitan France, a customs decision of 1942 specifies that postal shipments of food are "subject to payment of duties and taxes normally payable". Postal customs label serie E130 (Madagascar-1949): simply comprising tax figures materializing the customs clearance tax for 2kg cacao

Typical ship merchantman

Packed into jute bags of 60 kg net and subject to sanitary certification prior to shipment.

2.3 Meeting the industrial revolution

Packed in jute bags and shipped

Letter Card (France - 1897 - 189^e ed.)

chocolate Marnet export

The beans are a perishable food item and when shipped must be packed carefully in jute bags to ensure freshness and avoid infiltration of insects or mold. The shipment must not be more than 7.5% 'wet'.

Export cacao

shipping cacao

Only correctly dried beans are shipped from tropical areas, to their invariably much colder destinations to become delicious chocolate.

ICCO also provide guidelines on best known practices in shipping of cocoa.

Cocoa bags ready for export - Rabaul Harbour

The dried beans have a propensity to develop condensation and will re-absorb moisture when exposed to weather variants, and easily infested in transit.

2.3 Meeting the industrial revolution

Chocolate factories

The first chocolate factories appeared in Europe in the early 19th century. With the industrial production of cocoa powder in its infancy, the cost of the product began to fall.

Charlie and the Chocolate Factory
by Roald Dahl was based on Cadbury's factory next to his school, giving away chocolate to the students to try it. Dahl imaged himself working there and inventing a new treat.

Francotyp "A" (German Empire)

Encased postage stamp (Germany): From 1920 till 1923 issued emergency money due to lack of metal after WW1. The value was guaranteed by the use of a postage stamp. Back carries advertisement. Portola chocolate factory

Early in the industrial revolution new processes and improvements in machines speed up the production of chocolate. It became an object of trade and commerce that grew in popularity and began to take numerous different forms.

Busta Lettera Postale (BLP - Italy); letter card with advertising in favor of for WW I-victims

Perfin G&J (Galle & Jessen, Denmark – 1921)

reduced copy front

Almost every industrialized country has one (or more) chocolate factories. In Denmark, A/S GALLE & JESSEN, founded in 1872, produced both bitter and milk chocolate.

▲ Print proofs of advertising tabs of chocolate factory Galle & Jessen, which are only used in stamp booklets.

Galle & Jessen's factory advertising booklet (Denmark – 1931): 1 pane with variety of missing double line frame

Normal pane with double line frame for both

The factory expanded, relocating several times as the business grew.

It was initially based in a cellar at Store Kongensgade 6 in Copenhagen, but relocated quickly to larger premises at Toldbodgade 15 in 1873.

Advertising tabs with variety incomplete 'G'.

Print proofs of advertising tabs of chocolate factory Galle & Jessen, which are only used in stamp booklets.

The company was converted into a limited company (aktieselskab a/s) in 1883 and a large new factory at Vibenhush Runddel was inaugurated in 1884. The factory was later expanded several times.

impressive chocolate factory, Cailler

2.3 Meeting the industrial revolution

Steam engine contributions

The steam engine was crucial in mechanizing the process of grinding cacao seeds. Before the steam engine, cacao seeds were ground in mills driven by animal, wind, or water power. The power supplied by the steam engine enabled chocolate makers to streamline chocolate production in larger quantities.

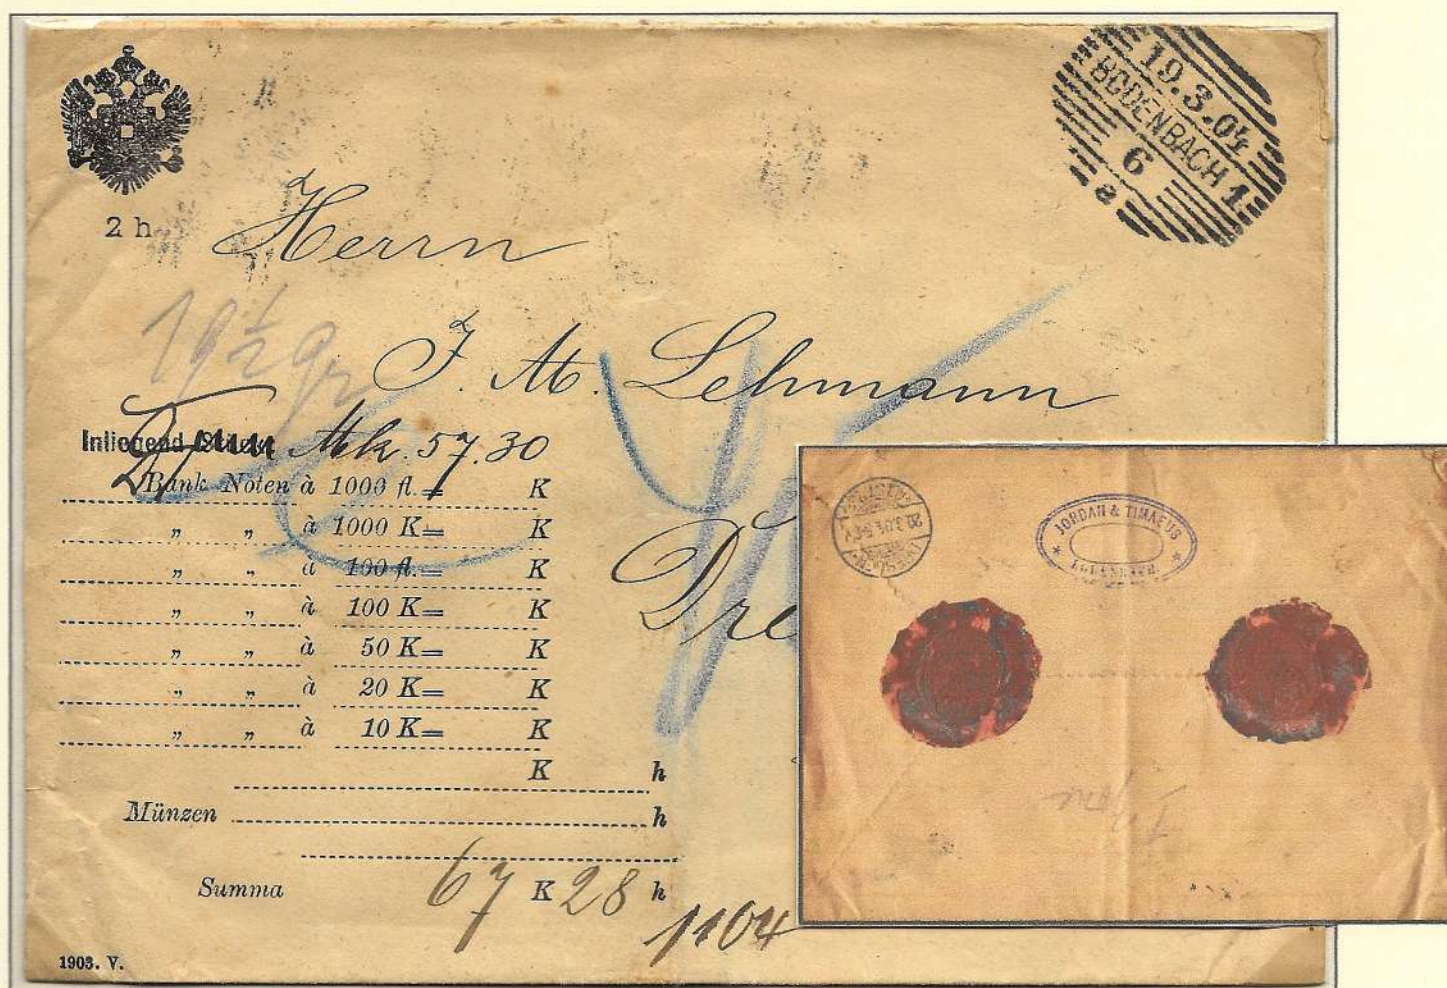

Steam Engine

Wells Fargo & Co stationery

created by the Post Office

Eureka Chocolate steam Mills
of E. Guittard & CO of San
Francisco

The machine factory J.M. Lehmann was founded in 1834 and contributed significantly with its developments for industrialization. They delivered machinery to many famous chocolate makers in the Germany and far beyond.

Chocolate factory Jordan & Timaeus (Bodenbach – Dčín, Bohemia) bought chocolate machines from J.M. Lehmann (Dresden). Letter (stationery 2 h) contained money (67k28h) and was sent (19.3.1904) assured and secured – hence unbroken red wax seals.

Chocolate factories are usually large, due to all the machinery needed for milling, pressing, for separating the cacao butter and of course, packaging.

'I love Lucy' chocolate factory episode: where Lucy and Ethel try to keep up with the out-of-control conveyer belt and stuffing the chocolates into their mouths and shirts.

East German Central Courier (ZKD - 1962) cancel. These port free cancels were used on mail from the Interior Ministry to other government departments and companies.

Conching is a most important step in the process to turn the beans into chocolate. Without this step, the resulting chocolate would be gritty, lacking the smooth, even texture that people associate with it.

Conching is the secret of a professional chocolate producer.

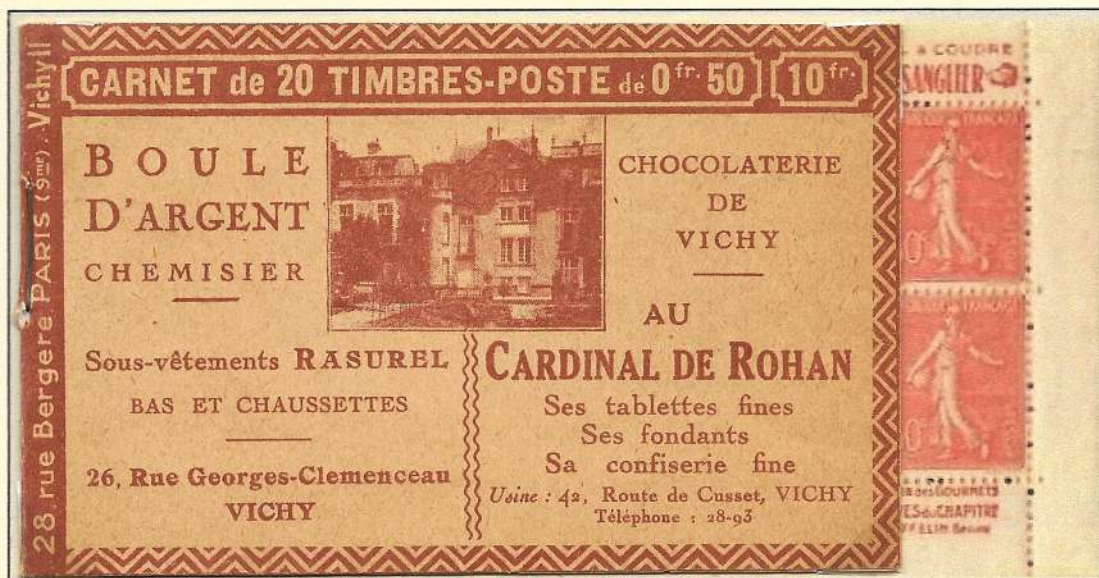

Die proof (Cameroon) engraved by M. Monvoisin

Bensdorp's Dutch-process cocoa is often used by Chocolatiers and bakeries. This typical process invented by Bensdorp treats natural cocoa with an alkalizing agent to lower its acidity, and thus allowing more of its pure chocolate flavor to shine through.

Charity letter series 96 issued May 1899 (Russia) 7k. sold for 5k. sent (17.06 on Russian calendar = 29.06.1900) from 11th city post Saint Petersburg to Milwaukee, Wisconsin (arrived on 14.07.1900) via New York (12.07.1900). Additional port 13k for registered mail to U.S.

3. Wonderful craftsmanship creates temptation

3.1 Fifty shades of chocolate

sugar plays a role

There are many different types or flavors of chocolate mainly depending on sugar.

Much depends on the quantity of sugar. Without sugar, cacao would be fairly bitter and too much sugar is not good for your health, or teeth.

◀ Black die proof

Sugar was added almost from the very beginning, even when Cortez brought his recipe to Spain.

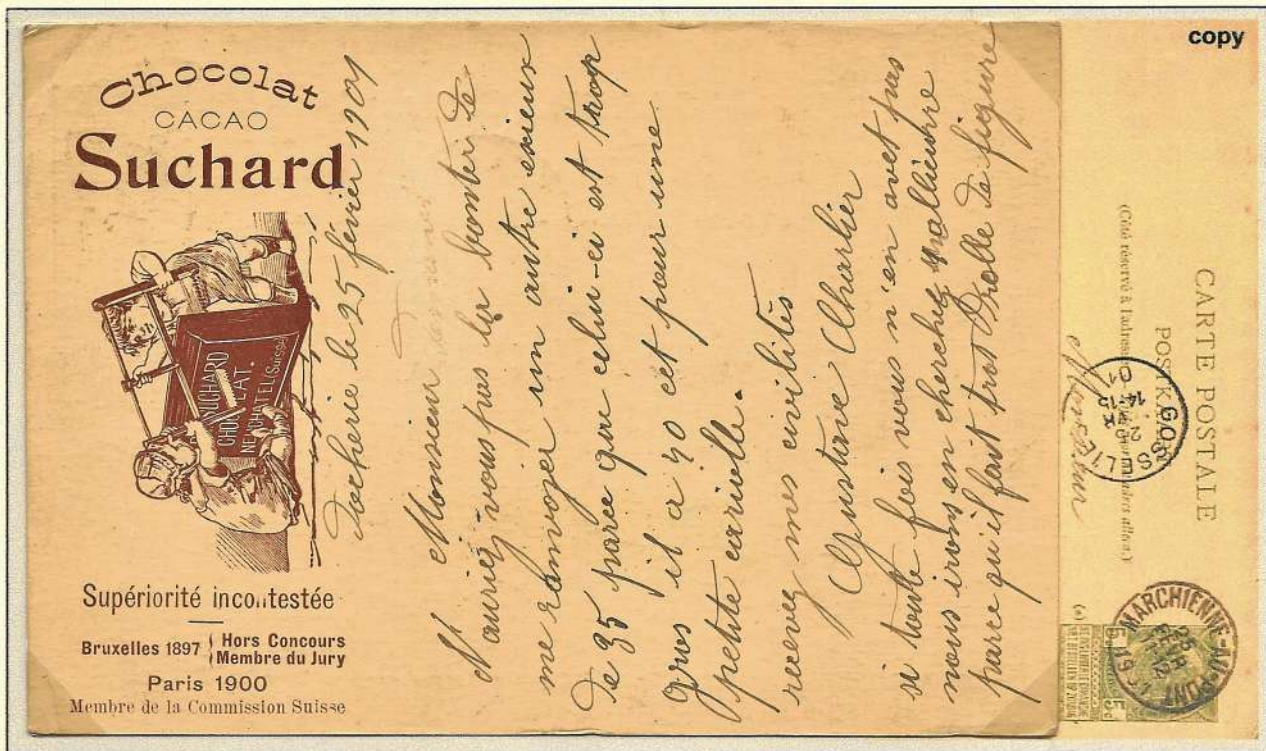

Many chocolate factories were also sugar factories, as they needed the sugar to create their flavor and brand.

mainly producing milk
chocolate

Printed to order letter card (Italy)
advertisement: Talmone;
cioccolato al latte = milk

A typical milk chocolate has 10% cacao liquor and an additional percentage of pure cacao solids: in Europe it must contain at least 25% cacao solids. Sugar and/or vanilla are added to make it creamy and to enhance the flavor.

It is by far the most popular chocolate, but less healthy than dark chocolate.

Printed to order envelope (Switzerland)

advertisement Lucerna; milk chocolate.

3.1 Fifty shades of chocolate

white chocolate

Francotyp model "C" (Nederlands Indië = Indonesia; used since 1929)

Begin 1930s, white chocolate was invented by Nestlé, mainly to get rid of the cocoa butter from their chocolate process.

White chocolate is the least nutritious of all. Containing no cocoa at all; it is prepared from cocoa butter (with cocoa solids removed) then combined with milk and sugar.

Personalized stamp (China)

Because a majority of the bioflavonoids come from cocoa solids, white chocolate has very low nutritional value.

White Chocolate is mainly used to cover cakes and pralines.

Neopost (Great-Britain; used since 1953)

In 1828 Coenraad **van Houten** patented an inexpensive method for pressing the fat from roasted cocoa beans. This created a 'cake' that could be pulverized into cocoa powder, which was to become the basis of all chocolate products.

grinding chocolate

Postalia Model P (Netherlands; used from Oct 55 till Jan 61)

Incomparable early Iberian method of grinding chocolate with the so called Dutched making process, which is easily soluble in milk or water. After the patent expired, production was taken over very quickly by other factories like *Cacao Blooker*.

Fosco brand beverage

Mixing cocoa or grated chocolate with butter makes cacao pasta; often part of a sweet breakfast.

Cacao pasta

Ready-to-Drink comes in a variety of delicious flavors in a bottle and is made from real cocoa powder.

3.2 Superb texture for good couverture

Couverture chocolate

Couverture (covering) chocolate contains a high percent (at least 30%) of cocoa butter, as well as a high percentage of chocolate liquor. This ratio makes it expensive but means the resulting chocolate is smooth, melting quickly, evenly.

pralines

Francotyp model "B" (Germany-1932)

Pralines company Henze

It is agreed that pralines are named after 17th century French diplomat whose name and title was César, duc de Choiseul, comte du Plessis-Pralin. The original praline was a sweet confection of almonds and a type of creamy, sugary, caramelized coating. Pralines may refer to sweets made from fruits or nuts, mixed with sugar syrup or chocolate, whether in whole pieces or as a ground powder.

3.2 Superb texture for good couverture

pralines

Swedish Bomb; Austrian creation, consist of sweetened egg white foam covered with chocolate

Tastes, sizes or forms are defined by the professional bakers or confectioner's talent and imagination. Brownies are a cross between a cake and a cookie with small pieces of chocolate for texture.

Pralines differ in every country.

Pralines: Belgian chocolates

The so called 'Belgian pralines' are considered the most famous, due to the smooth chocolate shell that was filled with cream or nut pastes.

mixing with dry fruit

Choco bar peanut slab

Chocolate fillings or mixes with dry fruit; such as hazel, walnuts, peanuts, raisins etc., broken or whole need to be stirred until thoroughly combined.

Publibel (Belgium-1936) inland tariff 35c from 01.02.1935 till 01.11.1938

When the mix is ready, small lumps of the mix are placed on parchment paper on a tray, or dropped into small molds and cooled until it has hardened.

£1 OFF WHEN YOU SEND A BOX OF BELGIAN CHOCOLATES FROM CHOCEXPRESS.

Think of someone close to you, then send them a box of these gorgeous Belgian chocolates for just £3.95. That's £1 off the normal price of £4.95. Wrapped in a tasteful gift box, they're a lovely way to let someone know you're thinking of them. We'll even include your personal message on a greetings card.

To take advantage of this offer all you have to do is:

1. Decide who you wish to send the chocolates to and, on a separate sheet of paper, write their name and address (including postcode) plus a short personal message (max. 10 words).
2. If you have a preferred delivery date, please specify. Minimum processing time is 7 days. See Terms & Conditions.
3. Fill in your name, address and delivery date in the space provided on the inside cover of this stamp book.
4. Then send the front cover of this stamp book as proof of purchase, along with your sheet of paper, and a cheque/postal order for £3.95 made payable to ChocExpress Ltd, to: Royal Mail Promotion, ChocExpress, Mint House, Newark Close, Royston SG8 5HL.

The Chocolate girl, by
Jean-Étienne Liotard

Pitney Bowes (USA-1956)

Baker's Chocolate company (USA) obtained the rights in 1862 to use 'The Chocolate Girl' image on their products, which became the inspiration for one of America's best-known, and oldest trademarks still in use today.

Francotyp "Cc"(Netherlands-1967)

Cocoa Droste : Droste effect

The Droste effect known in art as a picture recursively appearing within itself forever, is named after a Dutch brand of cocoa "Droste", with an image designed by Jan Musset in 1904. The effect has since been used in the packaging of a variety of products. It produces a loop which mathematically could go on internally, but in practice only continues as far as the image's resolution allows.

4.2 Displaying luxury with pots and cups

beautiful painted chocolate pots

A chocolate pot is taller than a tea pot and looks similar to a coffee pot. The difference is by the finial. It is either removable or it slides to the side and there was a hole in the lid and the little handle of the lid is bit crooked.

'Still life with a chocolate mill' by Spanish artist Juan De Zurbaran (1598-1664) - main attraction in Museum of (foreign) Art in Ukraine.

Chocolate was an expensive commodity in the 17th - 18th centuries and associated with expensive things. In Austria and Germany, the courts favored porcelain pots. In France the pots were either made of silver or china.

Meissener Porcellan

£1 book of stamps and the story of Wedgwood

18 at 3p 17 at 2½p 7 at ½p

Early days of Wedgwood
 Josiah Wedgwood (1730-95) founded the company in 1759 at the Ivy House Works, Burslem. Ten years later he moved to a model factory which he called Etruria. Soon he also had London showrooms and was exporting pottery all over Europe and to America. Queen Charlotte was so pleased with his cream-coloured earthenware that she allowed it to be called Queen's Ware, and permitted Josiah to style himself Potter to the Queen.

Only high society was able to display their self-indulgence with the full chocolate set of pots and cups.

4.2 Displaying luxury with pots and cups

right-angle handle chocolate pots

This pot follows a basic design employed by French silversmiths for much of the eighteenth century, with the handle placed at right angles to the spout that facilitates pouring by a servant.

Stuttgart city post stationery (Germany - 1896)

chocolate pot with right-angle handle

This standard design was also often used for French coffeepots as well, but only chocolate pots were provided with an opening in the lid, often hidden by a sliding finial, to allow insertion of a stick to stir the contents.

Advertisement letter card (France-1889): sold at 5c covering postage of 15c for domestic letter + 10c foreign fee for Leipzig (Germany).

Coffee pot with right-angle handle

Free translation of inside advertising page of booklet: No better habit than when you decide that chocolate should now be the traditional farewell drink at today's evening parties. A cup of Galle & Jessen's family chocolate - not too hot - guarantees a beautiful and style full end for every party.

Drinking chocolate together means preparing cacao hot or cold, in a special designed chocolate pot with a mill or whisk to mix. Served in special cups.

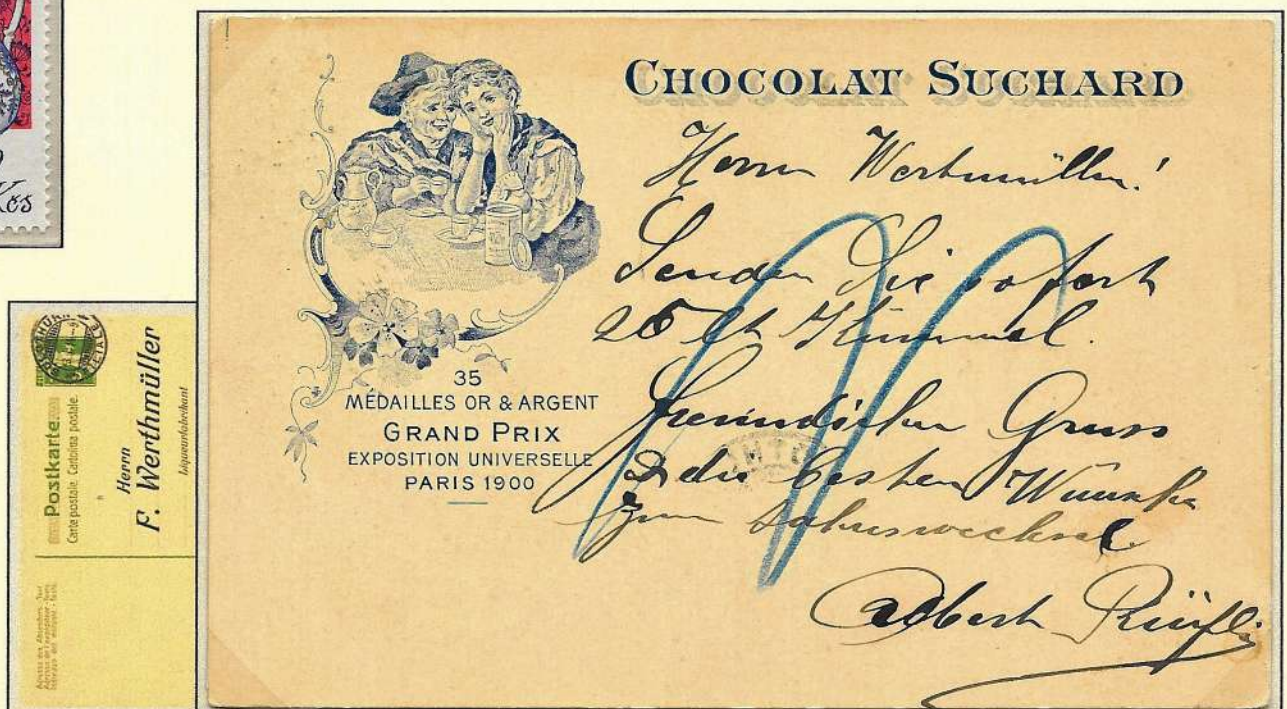

Francotyp Model "A" (Germany-1932)

▲ Gravure plate proof in original colors: designed by M. Ondráček (Czechoslovakia-1977) chocolate china set

In response to public demand, porcelain manufactures began to make specialized cups reflecting the unique requirements that each beverage demanded in brewing and presentation.

Stationery sold at reduced price by Suchard (Switzerland-1914)

chocolate set with cups and jugs

Today we usually use single-handed cups or bowls, which are a bit thicker than the cups for other drinks like coffee and tea. This is because cacao needs to be kept warm and stirred often.

For those with a shaky hands the *trembleuse* (literally trembling) cups were developed; double-handed cups with a raised ring or basket on the saucer, holding the cup in place preventing spillage of the expensive drinks.

Booklet (France-1924)

Chocolat Daccord - the great regional brand quality beyond reproach

A chocolate brand that wants to become a luxury product cannot produce just tasty chocolate, it has to create an imaginary world around it, make the customers feel that by buying this chocolate they buy something exclusive and something that is better than the other chocolates in the regional or even international market.

Postgiro envelope (Morocco-1927) postage free + airmail fee 1fr sent from Rabat to Lons le Saunier (France)
Chocolat Duc - Antwerp surpasses all other chocolates

The name "Indian River City" was too long for use on a postmark. They changed the name to "Cocoa". They were inspired by a box of Baker's cocoa and was adopted by the U.S. Postal authorities in 1884.

Roneo Neopost boxed N (Australia-1961)

Nestle Car Club

Many products 30 years ago came with an additional surprise like collectors cards of cars to keep and collect, and children were fascinated to learn this – it meant more chocolate to eat.

Air mail per **Uiver** (Netherlands) from Gorinchem 16.X.1934 to Medan (Indonesia) 25.10.1934 flown over during the London Melbourne **MacRobertson** Air race

The **London-Melbourne MacRobertson Air Race** took place in October 1934. Sir Macpherson Robertson, a famous and wealthy Australian chocolate manufacturer, sponsored it with a prize fund of £10,000 on the condition that the race be named after his chocolate company. The **Uiver** won the handicap race (with postal mail) and flew the 19,877 km in 90 hrs. 17 mins.

4.3 Effective branding for increasing success

fairs and exhibitions

Campaigns were not only limited to posters and strong slogans, often chocolate makers were present at fairs (salons) or exhibitions with their products on display.

1st Salon du Chocolat in Marseille

National expo of agriculture products: cacao

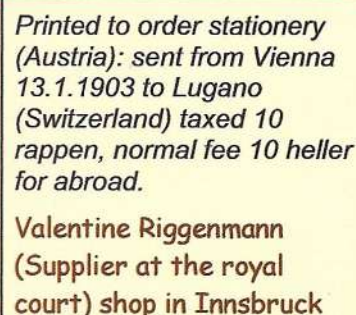

It a way of good publicity and thereby creating a market for all cocoa products. Meanwhile celebrating the joy of chocolate and promotes its health benefits.

Publibel (Belgium -1934) During the World Exhibition of 1935 in Brussels the brand "Côté D'Or", recognizable by the elephant, gained international fame when they distributed thousands of chocolate bars for free.

Chocolate factory J.S.
Fry & Sons medals in a
special frame from
company Jellinek

Being supplier at Royal Courts is a recognition of the best chocolate made, with the best cacao, by the best chocolate makers. chocolatiers and also cacao farmers.

Most famous example where chocolate was inspiring, is the shape of a 'Coca Cola' bottle designed in 1915. The designer was trying to learn more about the word 'coca'. Instead, he found cocoa and decided to just have fun with the concept, while he knew the beverage had nothing to do with cocoa. A picture of the gourd-shaped cocoa pod in the *Encyclopedia Britannica* was the model.

Children welfare stamps 'Kinderzegels' designed H. Kamerlingh Onnes (Netherlands-1929) with a dolphin, which are based on the logo of the Dutch chocolate factory 'Dolfijn'.

Phillipe Geluck (cartoonist) linked his bestselling comic strip 'Le Chat' to Jean Gallers (chocolate maker) famous chocolate brand 'kattentongen' (cat tongues).

Sometimes the revers happens. Chocolate brand logo's or designs by others inspires both worlds.

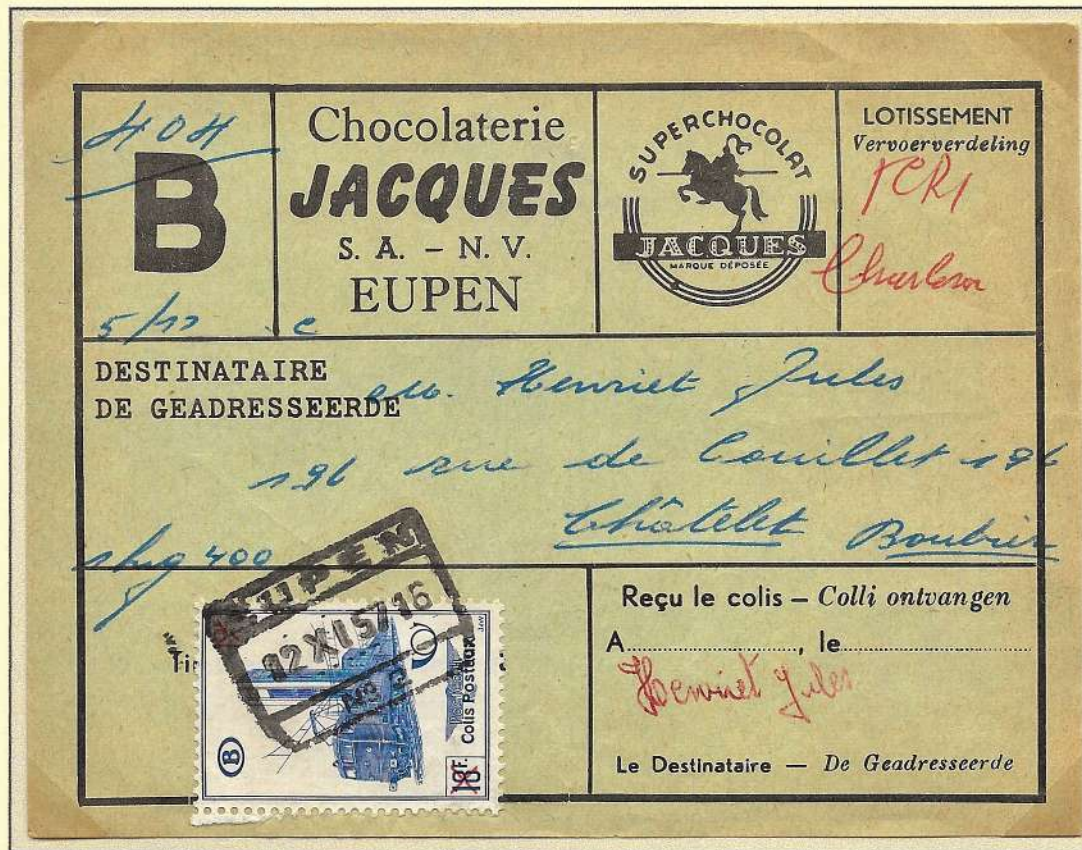

a 'chocolate tram' of Brussels

Stationery EXPRES rated 1F60 from Brussels (cancel BRUSSELS NORD 12.1.1927) to Liege (fee 30c + urgent letter 1fr + fee Tram 30c). **TRAM** Cancel (early date 3rd month of introduction); proof sent via postal letter box of tram, which was placed at the front of every tram (outside, right) for urgent postal mail or telegrams.

'The chocolate trams' was delicious nickname given by the citizens of Brussels for the chestnut brown colored trams which were in use in Brussels from 1889 till 1928. Since then they were replaced by crème colored ones.

4.3 Effective branding for increasing success

inspired by fairy tales

Chocolate companies also use graphical icons or logos inspired by fairy tales to aid and promote instant public recognition.

Jacques' typically chocolate bar mold.

◀ Postal parcel receipt (Belgium-1957)

Antoine Jacques founded JACQUES chocolate factory in 1896 and transferred it to Eupen in 1922. The logo with the knight stands for "faithful service to the quality".

Personalized vignette stamp (Belgium)
Poster Choco-Story museum in Bruges. The chocolate fairy was created by Pierre Wattiez Watch.

In 1926 master Chocolatier Joseph Draps sought a name for his company that embodied timeless values balanced with modern boldness. The famous story of Lady Godiva was the inspiration behind the Godiva chocolate name and logo.

Lady Godiva lived in Coventry, England, in the 11th century, a modest woman who immediately agreed to ride naked through the streets to lift the taxation for her fellow townspeople.

Hasler model "Mailmaster" (Belgium-1992)

shop and grocery selling domestic and foreign products as chocolates "El porvenir"

On the street or in shops and department stores, brands must be immediately recognizable, because the public in general are happier to see shop windows and interiors merged into works of art, so presentation fades to a secondary importance, and the brand itself is elevated to the status of modern icon.

5. Effects on the mind and body

5.1 Cure or confection? The beneficial effects

stimulation and weight loss

Francotyp model „A“(Germany-1931)

for theater, travel and sport

Francisco Hernández de Toledo studied medicine and botany, travelling in 1570 to the New World and described cacao as a divine beverage that builds up resistance and fights fatigue.

◀ Express stamp

chocolate is a good travel companion

The health effects of chocolate refer to the possible beneficial effects of eating it mainly for pleasure. It contains a variety of substances, some of which have a stimulant effect, or even act like an aphrodisiac for sportsmen, travelers, workers, lovers and others.

Stationery canceled in post office in Rue Claude Bernard (France-1902)

Dark chocolate is very good, it may help you lose weight, but the stimulating tastes of added sugar and other ingredients to make it even more delicious, can cause the opposite. **Claude Bernard** (French physiologist) detected c1855 that the sugar we eat is very bad for the liver.

▲ Partial miniature sheet shown

Pharmacies mixed cacao with medical products for the beneficial effects, especially for the taste.

The Menier Company of Paris was first founded in 1816 as a pharmaceutical manufacturer.

Booklet (Denmark-1934)

Advert Galle & Jessen Choko-min with whale liver oil

The combination of fermented cod liver oil in chocolate flavor was often used to stimulate and support overall well-being for children to eat this supplements.

5.1 Cure or confection? The beneficial effects

source of direct energy

Due to the high concentration of calories in a relatively small volume and the positive relationship between sugars and fats, chocolate is an important source of direct energy.

Publibel (Belgium-1934) 50c inland rating from 09.11.1931 till 01.02.1935

Malovine: "give strength to every age"

This is why cacao is extremely popular with athletes, students and anyone who wants to restore their energy quickly after heavy physical or mental efforts.

printed to order envelope (Switzerland-1924)

Ovomaltine: "strengthen you too"

Norwegian expedition ship FRAM.

A rescue mission for British sailor Bullimore during Vendee Globe race, found after 4 days his only food was a bar of chocolate.

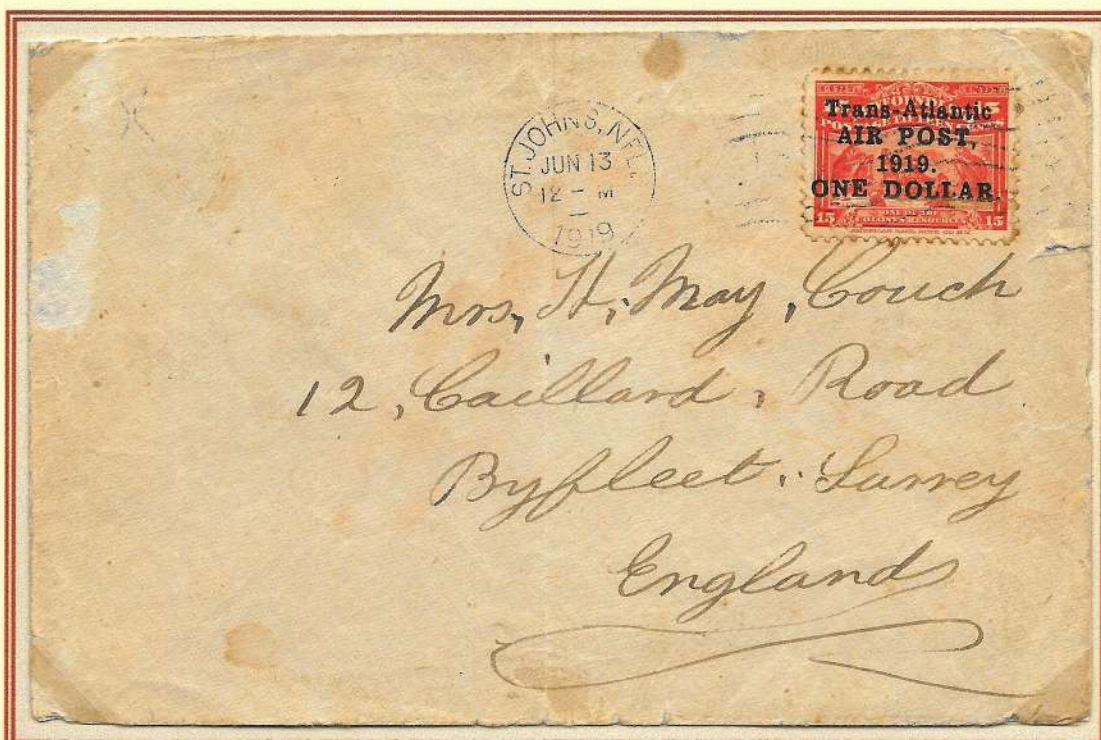

Sir Edmund Hillary

Well known as a 'complete food' whether used as a drink or solid bars on the Norwegian expedition ship **Fram**, or by Sir Edmund Hillary on his first climb on Mt Everest, and eaten on many other expeditions, even under extreme conditions. Compact, full of energy, easily eaten compared to foods too bulky to carry.

Universal „Multi Value“ EIIR(Great Britain)

Captain John W. Alcock said: "(Fry's) Chocolate was our chief solid food on the journey" after their epic nonstop flight across the Atlantic Ocean of over 16 hours, from Newfoundland to Ireland on 14-15 June 1919.

Cover from St. Johns Newfoundland (Canada) (13 Jun 1919) to Byfleet Sussex (England) carried by the first non-stop Trans-Atlantic flight flew by Cpt. J. Alcock and Lt. A. Brown, and carrying approx. 197 covers (much less are known), franked with the special \$1 on 15c stamp overprinted by "Trans-Atlantic/AIR POST, 1919./ONE DOLLAR".

CHOCOLATES
 DE
MAZAS LOPEZ

MADRID - ESCORIAL. Oficinas. Palma alta 8 MADRID

◀ Printed to order advertisement letter sheet (Spain-1905) sold at reduced rate of 10cts. Send from Madrid to Berlin; additional fee of 10 cts.

Are you a chocoholic? Everyone likes a sweet treat once in a while. But if you can't get through the day without a 'chocolate fix', it's possible that you may have a problem.

Eat sweets instead of smoking.

Translation text:
 Before taking Lopez chocolate. (thin)
 After taking Lopez chocolate. (thick)
 Take twice a day Lopez chocolate.
 (normal persons)

Researchers believe the release of the endorphins theobromine and caffeine, by consuming chocolate, creates a physical dependency to obtain a 'high-feeling' again and again, thereby suggesting it is possible to be addicted to chocolate, like alcohol or smoking.

Carob trees are cultivated in the Mediterranean region for its beans. Dried they are often ground to carob powder, an alternative for people allergic to cocoa.

Unfortunately some people are allergic to endorphins. An alternative is carob powder that tastes like chocolate.

Postal discharge with publicity (Hungary)

chocolate; 'sweets'

5.2 A booster for the mind and body

positive energy

When endorphins are released into the brain, giving credence to the claim that chocolate is a comfort food, the endorphins work to lessen pain and decrease stress. Another common neurotransmitter affected by chocolate is serotonin, known as an anti-depressant.

Pitney Bowes model "CA" (USA - 1952)

build energy reserve...

Breakfast for people in a hurry.

One of the more unique neurotransmitters released by chocolate is phenylethylamine, the so called "love drug" or "chocolate amphetamine". This causes changes in blood pressure and blood-sugar levels leading to feelings of excitement and alertness, increases mood, and decreases depression.

Publibel (Belgium-1935)

French text: "It's not a secret, but I give every day a cup of Cacao Kwatta to my children, what make them strong, vigorous and resplendent health."

Giving and receiving

What is the mystery? Why do we enjoy receiving chocolate as a gift? Obviously eating and tasting it due to the feel-good effects, but the enjoyment of giving, opening, seeing, smelling it - a lot of enjoyment, easily repeated.

Printed to order stationery (Switzerland-1913)

French text: ...we have won our chocolat

Soldier free mail (Germany-1916) Feldpostexp

Yes, the feel-good effect is only for a short period, but studies show that eating it regularly could cut the risk of heart disease and strokes by about one-third.

Red October factory chocolate sweet called Misha Kosolapy (Мишка Косолапый) was named after a brown bear and inspired by a painting of bears by the 19th-Century artist Ivan Shishkin.

It is the Theobromine in **ALL** types of chocolate that can kill your pets, and many other animals. even bears. Agitation, hyperactivity and gastrointestinal upset have been noted when a pet ingests 20 mg/kg of body weight. Theobromine toxicity has been fatal when your pet ingests 200 mg/kg of body weight.

Advertisement stationery of Suchard (Switzerland-1908) these post cards were sold at reduced tariff child keeps box of chocolate away from a dog

Deadly for all animals in large amounts, the darker or sweeter chocolate the more so, as many animals can taste sweetness, and can be attracted to eat more if it is available. White chocolate doesn't harm.

5.3 The enjoyment of chocolate

... during army time

Away from the frontline there was scope for men to improve their diet. Soldiers could receive food parcels from home with cakes, chocolate and other goodies.

◀ The Princess Mary Christmas gift box contained chocolate intended for the British Empire Armed forces on Christmas day 1914

Field post (Switzerland-WW I): post cards specially printed for soldiers in service to be sent without postage stamp.

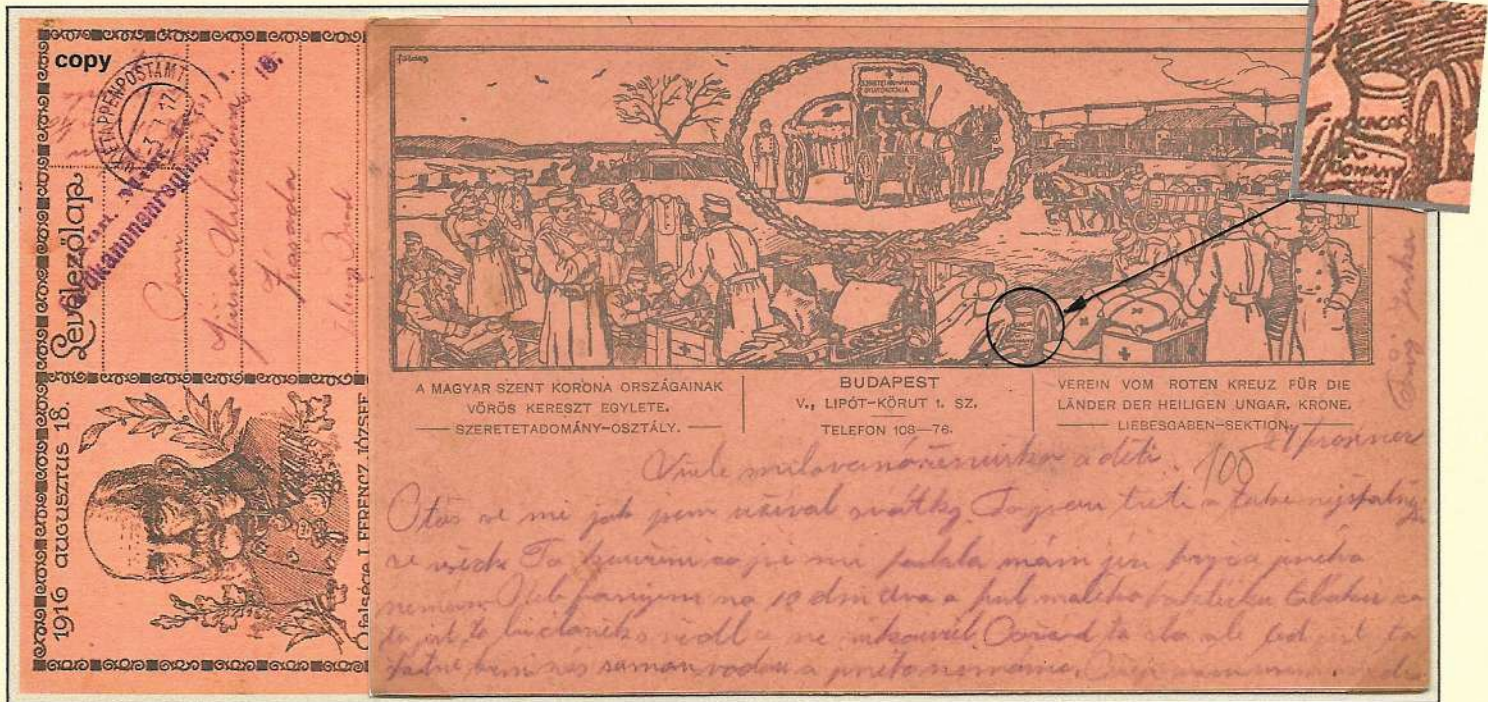

Soldiers having Christmas night together with hot cacao and coffee

That little piece of 'something special' brought some comfort, normalcy and a few moments to forget the awfulness of their trenches, and the brutality of war.

Field post (France-WW I) with Poulain advertisement

(translation): "If you want to do me a favor send me a big provision of Chocolate Poulain"

Hungarian-Austrian free franking field post (1917)

Red Cross delivery of goods: like cacao in a pot.

In both world wars prisoners and refugees received Red Cross parcels and as well as from home, to help them in difficult times when there was lack of food.

◀ The Netherlands was ravaged by famine in spring 1945, after hunger winter of 1944. More than 5300 flights with low-flying Lancasters dropped food on various places in the still occupied zones.

During the Berlin Airlift in 1949 children cheered at "the chocolate flyers" (planes) that dropped over 150.000 gum chocolate and candy bars, they attached to 'hand-made' miniature parachutes from handkerchiefs. ▶

They were able to exchange coffee, tea and chocolate for white bread, eggs and cakes, so they could survive and their life was a bit easier.

export 2.7kg Chocolate

During WW2 France was split, and restrictions were placed on foods like cacao, so they applied for resources in their colonies and possessions, but as from June 1941 the sending of family postal parcels was restricted by the Vichy regime. Restrictions carried on after the war, until 1950.

IRVA (Romania recycling agency): Glass and bottles in exchange for either 1 egg, 1 packet of biscuits, 1 chocolate bar, 100gr butter, 1 cinema ticket, 1 piece of soap, or 10 boxes of matches

Confronted with economic constraints and the scarcity of materials Romanians were encouraged to recycle glass for a piece of chocolate in return.

Booklet (France) Serie 98, 30c blue overprint SPECIMEN

advert Jacquin for baptising chocolate candy

One time-honored tradition was to present each guest with a tiny white bonbonnière (a favor), upon which the baby's name was traced. The boxes contain chocolates covered with a layer of colorful smooth sugar, known as "dragées de baptême".

Christmas wouldn't be complete without these quirky Christmas crackers, made with decorative paper and filled in some cases with chocolate treats along with a joke and ice breaker question. Those chocolate Christmas crackers are a trendy gift now a days with inside different flavors, like: dark chocolate with hazelnut, milk chocolate with Christmas spices or white chocolate with cranberry. Sublime!

Motherday ►

Valentine's day

Valentine's Day on 14 February is a big day for all lovers. When it comes to Valentine's Day chocolates, nothing is more exciting than giving a giftbox filled with chocolate treats.

Igor Fomin painting named:
The chocolates and the first sight love

It will be the highlight of their day when they are together. Of course they will love it.

stationery (Cuba-2018)
Valentine's Day chocolates

At the conclusion; let's enjoy it

Chocolate is good... but
your friendship is better

Havas model "C" (France-1955)

chocolates as a gift

If we give quality chocolate or even eat it together, it creates links between people in many way, providing a valuable cultural, social and even spiritual awareness. There is virtually no country in the world where chocolate is not a part of the culinary culture.
